

PVC

Specification Sheet

Gauge	0.54mm (+ or – 0.05%mm)	
Weight	610g/m ² or (+ or – 25g/m ²)	
Tear Strength	Warp	400N
	Weft	300N
Tensile Strength	Warp	2600N / 50mm
	Weft	2400N / 50mm
Coating Adhesion	70N / 50mm	
Flex Cracking	400,000 Cycles	
Stock Colours	Black. Other colours are available upon request	

PVC is a good all round material used where an all purpose cover is needed. The material is impervious, however the end product is not.

All information in this publication is based upon tests carried out by Bellowflex testing authorities or other suppliers. This information is believed to be correct at the time of printing. It is not possible, however, for Bellowflex to guarantee complete accuracy. Bellowflex requires that users establish the suitability of all products for their application and assume all risks.
